"I am very impressed by the variety of responses and also by the similarity of answers that I would have given, especially in regards to my favorite topics, life after death and millennium prophecies." Dr. Elisabeth Kubler-Ross Best-selling author of "On Death and Dying"

"We are twelve Archangels here as mentors, guides, teachers for the evolution of consciousness for humanity. It is a time of grand transition and evolution of consciousness that allows for all individuals to come into the wholeness of their being, to integrate their soul in its totality and to express that upon this planet." - THEO

"As the words flowed from Sheila/THEO, I felt them penetrate to the core of my being. A feeling of love flowed to me and through me like nothing I had ever felt before."

In 1969, Sheila Gillette nearly died following a pulmonary embolism suffered during the birth of her third child. Following her improbable recovery, Sheila began experiencing various types of psychic phenomenon leading her to become the direct voice

channel for twelve archangels known collectively as THEO. Sheila's psychic abilities have been verified by para-psychological researchers, physicists and other scientists across the country, as well as by the thousands of people that have sought THEO's insight.

Sheila and Marcus Gillette invite you to personally experience the twelve Archangels known as THEO, who speak through Sheila, a world-renowned spiritual medium and author. By receiving their messages into our hearts, we can begin to recognize and eliminate the old patterns and ways of being that simply no longer work. The new ways are now being revealed that richly reward those who seek to explore an accelerated path of spiritual development, which THEO teaches, called Soul Integration.

Taking human potential to a whole new level, THEO provides the tools to transcend the limitations of the physical world and enter into the timeless dimensions of the Soul. As you awaken to this unlimited spiritual energy, you will feel the joy and excitement of manifesting peak spiritual experiences and illumination that until now have been thought to be the exclusive domain of saints and mystics. By learning to access the realms where miracles are created, you can join the millions of ordinary people now having extraordinary experiences.
